Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims limitations reads non tangible subject matter. The user interface and database are software constructs must be embedded on or along with a tangible medium to satisfy the intent of this statute.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "system" as claimed is indefinite. Clarification is required as to the class of invention the applicant wishes to pursue. Claim 13 and 17 fail to further limit the computer terminal of claim 1. In claim 15, a patent drafting system is indefinite as to its components. In claim 17, it is not clear which component performs the method.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3624

4. Claims 1-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Unlock the Value of Intellectual Assets, McKinsey & Company.

The 112 issues cited above, require certain assumptions to be made regarding the nature of the invention. The applicant has interpreted the system to read on computer terminal. Applying the art to the instant claims, the "online market" (page 3) of the prior art, inherently possessing a user interface and a database, anticipated the claimed apparatus. The prior art also anticipated Claims 2-7 which only require an interface. Claim 9-12, and 13 reads on a chat room to which the examiner takes official notice exist in internet market places.
